- Act CXII of 2011 of Hungary on the Right to Informational Self-Determination and Freedom of Information

Your data, as the data of a user of the website of the Festival (www.lisztfest.hu) and its services, shall be processed only when you have been duly informed and you have given your express consent. In addition, Müpa Budapest shall process data for the performance of a contract with you, for legitimate interests or on the basis of an express legal requirement.

1. THE SECURITY OF YOUR DATA, AND OUR DATA PROCESSING PRINCIPLES

Müpa shall treat your personal data in a manner that is as transparent as possible for the sole purpose of a specific, clear and legitimate purpose, only to the extent required and for the briefest period necessary to achieve the purpose, in a manner that is legitimate and fair in all respects. We pay great attention to ensuring that the data we process is accurate and up-to-date. However, we are aware that compliance with the above is meaningless if technical and organisational measures are not taken to protect personal data.

That is why we chose our processor partner, Crane Kft. to assist us in processing the majority of our personal data, as it has been operating in accordance with ISO 27001 Information Security Standards since 2017, guaranteeing that your personal data is processed in accordance with the highest standards.

We have also designed our organisational structure, which we operate through strict internal organisational rules and the allocation of different access rights, so that we are able to provide, at all points, the necessary guarantee for the transparency of our data processing and for the security of your personal data. Müpa will not disclose any personal data to third parties without the consent or prior notification of the data subject unless specifically required to do so by law or by instruction of a competent authority. Müpa will make every effort to ensure that your personal data cannot be accessed by any unauthorised person by implementing appropriate technical measures (operation of a single internal IT system).

We organize in-house training and invite external trainers to keep such employees involved in the processing of personal data informed about the latest technical and legal requirements, so as to ensure the processing meets all legal and information security technical requirements at all points.
